

Impact of Social Media on youth

Description

Positive Side :-

- Through Social media, youth is exchanging ideas & views in a win-win situation.
- Youth are turning into more understanding, when it comes to <u>cultural differences and</u> misunderstandings.
- Youth are now well aware of the things happening around the world because of ready information available in social media.
- Teachers are interacting with students and their parents efficiently.
- Social service is now became a trend among youth.
- Young entrepreneurs are attracting investors through social media.

Negative Side:-

- Addiction is a major negative side of social networks.
- Being overly active on social media has caused many <u>serious disorders</u> like insomnia, depression, poor inter-personal relationships, lack of concentration, high level of anxiety, ignorance and rudeness.
- Around 75% of youth creates profiles on multiple social networking sites and end up in spending most of their valuable time on updating each site number of times every day.
- On 8th of January 2017 a case of <u>selficide</u> was reported at AIIMS which is an addiction of taking selfies and this is in turn due to addiction to social networking.
- Some youngsters has <u>lost connection and relationship with their family members</u> and relatives due to excess use of social networking sites.
- It also <u>effects them economically</u> as the youth spends good amount of money for internet data packs.
- Some young people have lost jobs due to <u>bad performance at work</u>, because of spending a lot of time on social networks.
- Few young people <u>are being trapped by criminals</u>, who are using fake profiles in social networks to trap innocent youngsters.

Conclusion:-

Social media has a great impact on youngsters. Youth needs parental guidance to what is good and what is bad, so that they can protect themselves while enjoying the benefits of social networking.
