

Things that are worrying :-

- Pollution.
- Deforestation.
- Dumping industrial wastage in water leading to water pollution.
- Almost everyone know how to protect environment. But only some of them are practically following.
- Increased plastic usage.
- Hunting.
- Reduction of resources because of population growth.
- Negligence of some municipality officers.
- Usage of fertilizers having chemicals for crops.
- So many animal and bird species are losing their existence. Next species which is going to lose its existence is human beings.
- We are breathing polluted air and we are taking polluted food.
- New diseases.

What needs to be done :-

- Planting trees and protecting trees, which are already there.
- Increase in the number of wild life sanctuaries and maintaining them properly.
- Afforestation. Govt. should take action on those, who are causing deforestation, hunting and smuggling.
- Every municipality dept. must work honestly.
- Spreading about the methods of water conservation and usage of natural fertilizers for crops.

Conclusion :-

Everybody and also Govt. must have a will to save our environment. We should remember that environment is not only trees, water and air but also all animal species together makes environment.
